

Bee City USA - Rome

Report on 2020

Pollinator Habitat Creation & Enhancement

Our committee worked with Parks and Rec to buy 25 pounds of wildflower seed to reseed existing pollinator plots and add 2 new plots.

One of our existing plots at Alto Park in the summer that was reseeded in the fall.

Education & Outreach

Our committee put on virtual pollinator month activities including story time, activities, provided coloring sheets, and hosted Zoom presentations about our Bee City affiliate for local garden clubs. Our Beekeepers Association continued to meet virtually with information about beekeeping.

Policies & Practices

Integrated Pest Management Plan:
